## **McGraw-Hill's Award-Winning Educational Software System Releases its Newest Update**

**Columbus, Ohio** – Glencoe/McGraw-Hill released its newest version of *PassKey: A Prescriptive Learning System* in June to all of their current PassKey customers. The newest version 2.21 contains many new updates and enhancements that make using the PassKey program easier and more effective.

The new version contains nine new math lessons and updates to over 130 reading and writing lessons - new graphics and restructured lesson content. The 2.21 version also contains new installation procedures for both standalone and networked systems to make installing PassKey easier. New correlations to state tests were also added along with updates to many existing correlations making PassKey correlated to over 50 state and national proficiency tests.

“The new math lessons added vary in content from converting measurements to exploring polygons and strengthen our Math module,” commented Lisa Ramsey, Marketing Manager. Glencoe/McGraw-Hill will continue to update PassKey with new lessons and management system enhancements to ensure that the content contains the most current up-to-date information meeting the needs of teachers and students.

Glencoe/McGraw-Hill is a division of The McGraw-Hill Companies, a leading information services provider meeting worldwide needs in education, business, finance, the professions, and government. Founded in 1888, the Corporation today provides information and analysis in multiple media through its rich portfolio of valuable brands.
